

Quarterly Site Inspection Report

Prepared by: Local AI Assistant
Date: 2026-06-15

Summary

This is a sample document generated by `export_doc.py` to demonstrate that the local-AI setup can produce **real PDF and Word files** from model output — not just plain text.

Findings

Item	Status	Notes
Foundation	OK	No cracks observed
Wiring	Attention	Two outlets ungrounded
Plumbing	OK	Pressure within spec

Recommended Actions

- Re-ground the two flagged outlets.
- Schedule follow-up in Q3.
- Archive photos to the knowledge base for RAG retrieval.

Note: diagrams and charts are best produced as Mermaid/matplotlib code, then rendered — crisp and editable on any hardware.

`export_doc.py` handles the rest: markdown in, PDF/DOCX/HTML out.
